JAYANT NARAYAN DASH

Software Architect | Mobile Engineering | Enterprise Software Development
GitHub: https://github.com/jayantdash
LinkedIn: https://www.linkedin.com/in/jayant-dash | Email: jayantnd@gmail.com

PROFESSIONAL SUMMARY

Software architect and engineer with over 15 years of experience in software development, specializing in mobile applications, enterprise software architecture, and engineering solutions. Experienced in iOS and Android development, reusable frameworks, API integration, application security, and CI/CD automation. Currently pursuing a Master of Science in Computer Science with a concentration in Artificial Intelligence at Boston University. Interested in technical leadership, scalable software systems, and applying AI to real-world engineering challenges.

TECHNICAL SKILLS

Programming: Swift, Objective-C, Kotlin, Java, Python, JavaScript, TypeScript, Go

Mobile Development: iOS, Android, SwiftUI, UIKit, Mobile SDK Integration

Architecture: MVVM, Clean Architecture, Design Patterns, Dependency Injection, Repository Pattern

Backend and Networking: REST APIs, GraphQL, gRPC, Node.js, HTTP Networking

Cloud and DevOps: AWS, Docker, GitHub Actions, CI/CD, Git

Engineering: Application Security, Performance Optimization, Debugging, Testing, Technical Design

PROFESSIONAL EXPERIENCE

Comcast — Software Architect / Architect 5

August 2019 – Present

- Work on architecture and development of enterprise mobile applications.
- Design and maintain reusable components and application architecture for mobile software.
- Work with cross-functional teams to analyze technical requirements and implement solutions.
- Contribute to improving application reliability, security, maintainability, and development workflows.
- Support technical investigations, integration challenges, and engineering decisions.
- Participate in initiatives involving CI/CD improvements and developer productivity.

Comcast — Software Engineering Contractor

April 2016 – August 2019

- Contributed to mobile application development and enterprise software solutions.
- Worked on application features, API integration, troubleshooting, and software maintenance.
- Collaborated with engineering teams to implement technical requirements.

Microsoft — Software Engineering Contractor

August 2015 – April 2016

- Contributed to software engineering and application development activities.
- Worked with development teams on technical implementation and problem-solving.

Softtrends — Software Engineer

July 2009 – August 2015

- Worked on software development and application implementation.
- Contributed to software functionality, maintenance, debugging, and technical improvements.

EDUCATION

Boston University
Master of Science in Computer Science — Artificial Intelligence
In Progress | Started Fall 2026

Berhampur University, India
Master of Computer Applications (MCA), 2007

Berhampur University, India
Bachelor of Information Technology (BIT), 2004

SELECTED TECHNICAL PROJECTS

Swift Network Framework (snf)
https://github.com/jayantdash/snf

A Swift networking framework project exploring reusable networking functionality for applications.

ObjectiveXML
https://github.com/jayantdash/ObjectiveXML

An Objective-C utility for converting XML data into NSDictionary and JSON.

Swift Foundation Framework (SFF)
https://github.com/jayantdash/SFF

A Swift framework project focused on reusable foundation components.

PROFESSIONAL DEVELOPMENT

- Graduate coursework in computer science and artificial intelligence.
- Continued learning in machine learning, statistics, linear algebra, and responsible AI.
- Interest in engineering leadership, AI-assisted software development, and production software architecture.
